

天津远泰模块房制造有限公司

Tianjin Yuantai Module House Co., Ltd

YUAN TAI

天津远泰模块房制造有限公司
Tianjin Yuantai Module House Co., Ltd

Tianjin Yuantai Module House Co., Ltd. was established in May 2011 with a total investment of more than 80 million RMB and a total construction area of 26,666 square meters. Yuantai modular house products include mobile villas, steel art rooms, four seasons tents, bar cars, cold drinks bars, mobile toilets, outdoor garden crafts and so on.

With the rapid development of China's economy and the improvement of people's quality of life, China's tourism and leisure market, there is a great need for such a leisure place that provides convenience and three-dimensional service. Villa-type modular room, also known as the home on the wheels, it has two functions - room and car. It is a special category in the RV. The modular room is comfortable and convenient, the living space is large, and the modular room is reflects humanized and convenient. With a keen eye, Yuantai Company firmly grasps the rare development opportunity and continuously increases the investment of technology, talents and funds. It has opened up the market with integrity, innovation and win-win business philosophy, and has formed 800 sets of annual processing module rooms.

Yuantai's independent engineering design is the core competitiveness of the company. It can provide customers with one-stop service of design, construction, and implement according to different needs. With a professional vision, we provide customers with business plan in the project area, the layout of mobile villas, the number of rooms allocated, and the investment recovery period. Yuantai is willing to work with you to create a better future.

COMPANY

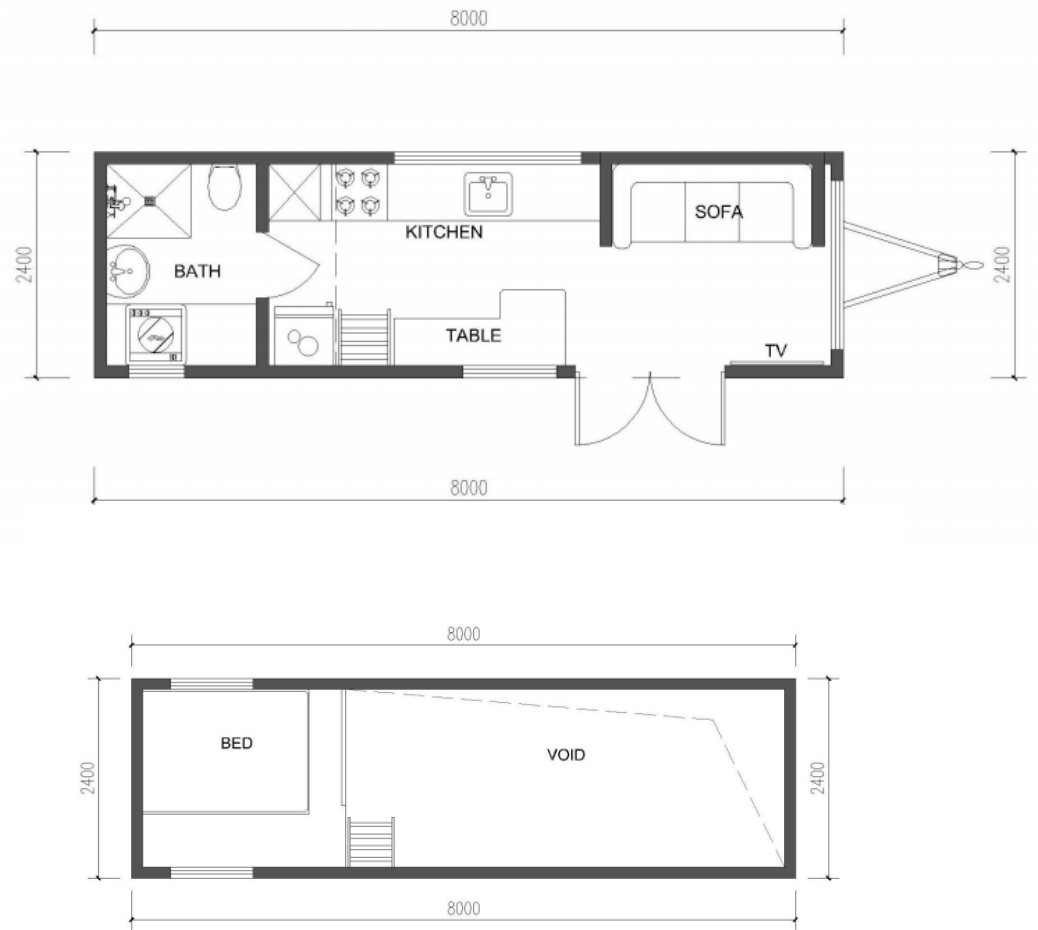

Benefiting from high quality and good services we are famous in China, and now trusted by clients from U. S. A, Canada, Russia, Africa etc.

横山岛、黄骅项目

Hengshan Island and Huanghua Project

Unique Characteristics of Module House

1-Design and Construction Requirements

The construction period is short, and the unique structure technology is adopted to meet the construction requirements of different projects
Safe structure and convenient transportation

01

04

4-Residents' experience needs

Exquisite interior, warm, comfortable, environmental protection, create an artistic spatial pattern

5-Housing quality demands

05

Unique production process, heat preservation integration, high efficiency and energy saving, good air tightness, warm in winter and cool in summer

The advantages of earthquake resistance, moisture resistance, salt and alkali resistance and snow resistance

6-Planning needs

Style modeling, participate in the overall planning and land construction of the project, and integrate into it

06

模块房

02

03

2-Functional Requirement

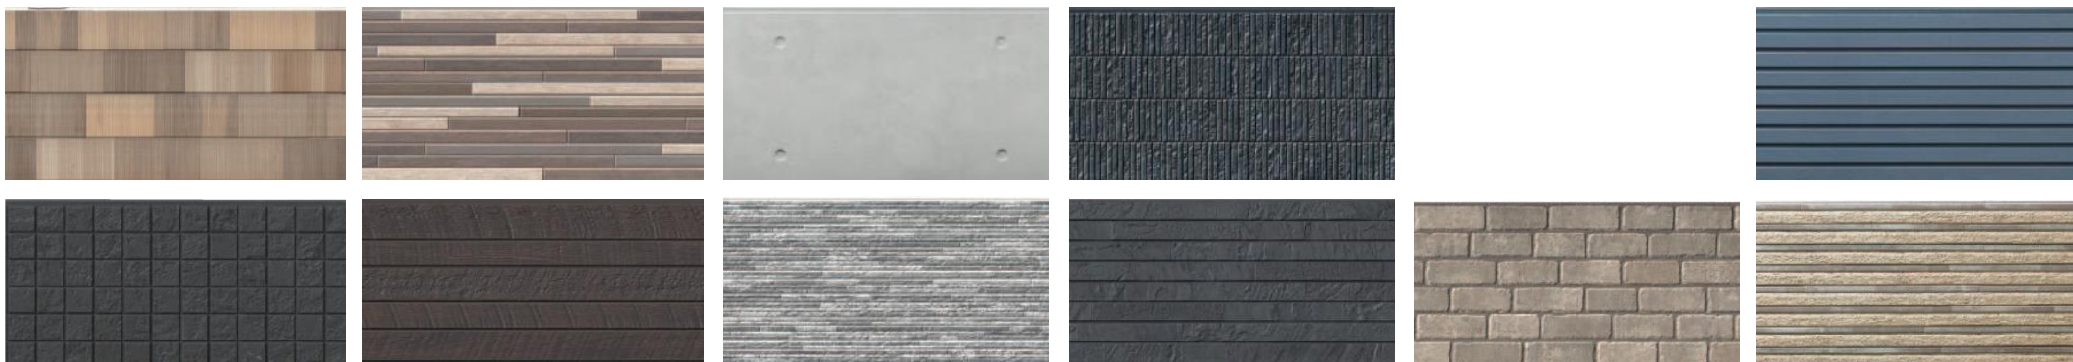

Flexible spatial combination form,
Create a comfortable and diversified living space

3-Modeling requirements

Beautiful appearance, generous, full of vitality, to meet the visual experience of residents

外墙板特点

- **安全性：**所有产品均有无石棉标志，为市场提供了100%环保型安全绿色建筑材料；
- **耐候性：**使美观效果能够长期保持，从而减少维修费用，具有良好的经济性；
- **隔音性：**具有能于楼房双层窗户相媲美的隔音性能，经测试，单体的透过损失为32分贝；
- **隔热性：**热传导率低，其优异的隔热保温性能，能够有效地提高墙体的保温效果，是理想的节能环保型材料；
- **耐久性：**采用将外墙装饰材料的底板在高温高压的炉中一气硬化的“蒸压罐养护”法，使干燥引起的收缩和热引起的膨胀几乎完全消失，从而获得了稳定的强度；
- **阻燃性：**经过中国的燃烧性能评估，此板可作为A级防火材料使用；
- **耐震性：**地震时可减轻对住宅建筑物负载的影响。可有效通过金属挂件固定施工法来防止外墙的开裂及剥落；
- **自洁性：**在材料表面均匀分布着二氧化硅粒子，氢氧基可以吸附空气中的水分子，使墙板表面形成一层水分子薄膜。污物沾在水分子上会通过雨水被冲洗掉，随后又会产生新的一层水分子薄膜，使墙体一直保持干净美观的效果，可三十年免维护。

Features of exterior wall panels

- **Safety:** All products have no asbestos mark, providing the market with 100% environmental protection type safe green building materials;
- **Weather resistance:** make the aesthetic effect can be maintained for a long time, thereby reducing the maintenance cost, with good economy;
- **Sound insulation:** can be comparable to the building double window sound insulation performance, through the test, the loss of the monomer is 32 dB;
- **Thermal insulation:** low thermal conductivity, excellent thermal insulation performance, can effectively improve the thermal insulation effect of the wall, is an ideal energy saving and environmental protection material;
- **Durability:** the "autoclave curing" method of hardening the bottom plate of exterior wall decorative materials in a furnace with high temperature and high pressure makes the shrinkage caused by drying and expansion caused by heat almost completely disappear, thus obtaining stable strength;
- **Flame retardant:** After China's combustion performance evaluation, this board can be used as A class A fire material;
- **Seismic resistance:** can reduce the impact of the load on residential buildings during the earthquake. Can effectively through the metal pendant fixed construction method to prevent the wall cracking and peeling off;
- **Self-cleaning:** evenly distributed silica particles on the surface of the material, hydroxyl can adsorb water molecules in the air, so that the surface of the wall board to form a layer of water molecules film. Contamination with water molecules will be washed off through rain, and then a new layer of water molecules will be generated, so that the wall has been kept clean and beautiful effect, can be 30 years of maintenance free.

质量管理体系认证证书
